

## The URiM Pathway to Pediatrics

An in-person  
view of the field  
of pediatrics

.....

**Practicing medicine is so much more than learning about photosynthesis or covalent bonds in your standard pre-med classes.**

The **URiM Pathway to Pediatrics** (UPP) is a day designed for undergraduate students from historically under- represented and underserved backgrounds in Vermont, New Hampshire and upstate New York who are thinking about a career in medicine. We especially encourage students who are members of groups that the Association of American Medical Colleges (AAMC) has identified as Underrepresented in Medicine (URiM)\* to consider attending.

With hands-on and interactive activities throughout the day, participants will learn about what it really means to be a pediatrician. Come join us to explore all the great things this career in medicine has to offer!

- Solve a real-life clinical mystery case
- Have lunch with current medical students from the UVM Larner College of Medicine
- Practice medical procedures, ultrasound techniques, case scenarios and more in the Clinical Simulation Laboratory
- Attend a Health Advocacy panel and develop advocacy skills
- Network at an evening mixer

\*The Association of American Medical Colleges defines under-represented in medicine (URiM) as "racial and ethnic populations that are underrepresented in the medical profession relative to their numbers in the general population."

**Saturday,  
April 30, 2022**

**10:00 am - 7:00 pm**

**UVM Larner College  
of Medicine campus**

**89 Beaumont Avenue  
Burlington, Vermont**
